

## APRIL 2008 WEBSITE REPORT

### ANNEX

The Annex continues to run all departments on a five day a week basis, with some maintenance being done on the weekend. Our LVL Engine assembly is looking to increase from 300 units per day to 350 units per day. The Annex Union Office is currently working with management to bring back as many jobs as possible do to this increase. At this time our Stock department [8638] has been conducting studies to determine if there needs to be an increase to accommodate the LVL.

The demand for the V-10 [6.8L Engine] is due to increasing fuel costs and the higher Diesel prices having consumers looking towards our gas engines.

THE ANNEX MOTORS ON!
