

JANUARY 2008 WEBSITE REPORT

WINDSOR ALUMINUM

North Line - The company is still doing some programming. They want it up and running by Feb 18/08. I don't think that is realistic at this point in time. Production 171 members and Trades are at 71 in the plant.

South line is still running 3.0 L blocks 8 hours on days, 4 hours on #1 shift, 5 Days a week. The G.M. side of the business 3.6 L blocks are running 3 shifts 7 Days a week 8 hours for maintenance on the weekend.

Rally at Jeff Watsons office on Jan 17/08 - The W.A.P. Union Office would like to thank every one that participated in the rally. It was great to see the amount of support from W.A.P. workforce on such short notice. Your turnout was critical in getting the message out to our politicians that we need them to put our automotive industry on their priority list.

In Solidarity,
Mark Davidson
Plant Chairperson
Windsor Aluminum
