

MAY 2007 WEBSITE REPORT

ESSEX ALUMINUM

I would like to thank everyone from the Essex Aluminum Plant that took part in the Community Rally. It was outstanding. To see that many people take part in the community for a common cause was excellent.

For the last 5 months, all of the departments have been running outstanding. Again, we are not doing a whole lot different than we have in the past but we have the extra manpower to insure that the equipment stays up and running. When this happens the MPH rate goes up and people are starting to take notice. I just hope that the people that take notice now are the same people that said EAP could not get to this point.

Lock Out

Everyone must lock out. If you don't it could maim you or worse, it could kill you. It is your right to Lock Out to make sure it is safe for yourself to go in to a piece of machinery. **Always protect yourself.**

When it comes to smoking you have to remember that you can not smoke in the plant. You must go outside of the building. More and more people are getting written up for this, so brothers and sisters take the extra steps to ensure that you are out of the building so the Company doesn't start suspending people.

I would like to thank all the people that took part in the JDRF fund Raiser in are plant, Marcel Sleiman, Al Hernandez, Clarence Market, Doug Dessario, Brent Fitzgerald, Scott Trepanier and Larry Pitre. This is something that is very near and dear to my heart, so once again you all did a great job.

Frank Kotow
