

OCTOBER 2007 WEBSITE REPORT

ESSEX ALUMINUM

As of now 8570, 8580 and 8590 are totally done. For 26 years these three departments ran and put out an excellent product. Millions of heads were made in these 3 departments and it was because of the people that worked there. Again I would like to thank the people that worked there for the GREAT jobs they have done over the years.

All members of Local 200 the Company has come to us saying that from now on you will automatically be given a 5 day suspension for not locking out. It is your privilege and your right to Lock out and make it safe for yourself before entering into a machine. So first and foremost before you even think of working in a machine LOCK IT OUT.

It is very easy to see that the Company does not think highly of their work force. To do the stupid things that they do, can show you this. When things are going half decent they try to turn it in to a train wreck, have every one mad at each other and they go on there merry way thinking they have the upper hand. The funny thing about this is they will then come back to us saying we need a hand with this to save our bacon. WRONG they have a job and we have a job. We will do our job now they have to start doing there job. You have to watch yourself because if it is between you and them they will screw you.

I would like to Thank Pam Sleiman for the great job that she did with United way. Even with all the cut backs she did a outstanding job.

Frank Kotow
