

SEPTEMBER 2007 WEBSITE REPORT

ESSEX ALUMINUM

I would like to take this opportunity to wish well to all the Union brothers and sisters that worked in the Base heads. For almost 27 years Base head core and clean supplied heads to EEP. I am sure that I heard that there were 27 million heads that were made during this time. This is an outstanding feat that everyone should take great pride in. My thanks for the job that you have all done.

We had are state of the plant meeting and thing are about the same if not worse for our future. For the EAP plant there is no new product in sight. The only product that we had the 6.2I was given to Nematik Mexico, which is pretty odd knowing that Local 200 were the people that stumbled across it. Only goes to show where this company is at. History and Pride means nothing to them.

I would like to take this opportunity to congratulate Chris Taylor for running and getting elected as Skilled Trade Chairperson. There is no doubt that there is a lot of work ahead of him and he will be up for it.

Frank Kotow
Plant Chairperson
