

JUNE / JULY 2007 WEBSITE REPORT

WINDSOR ALUMINUM

Plant Schedules

The main building 3.0 litre operations continue to operate on a five day casting over three full shifts. Plant management continues to see the volumes staying until at least some point in September. At that point we could be looking at an in plant reduction of 70 people over three shifts.

In the expansion 3.6 litre dept, the volumes levels continue to be 1200 + per day which will require this area to operate on six and 1/2 day casting operations. The cost pressures are getting better as productivity and quality have steadily improved.

Club 200 Raffle Draw August 31, 2007
