

## **AUGUST 2006 WEBSITE REPORT**

### **WINDSOR CASTING**

Presently, WCP has 541 on roll, 342 in production and 199 in the trades. Production schedules are as follows. Block commodity is running between two and three days a week due to the decrease in 3.9 / 4.2 volumes. The crank commodity is presently running on a five day schedule with occasional overtime to pack 2.3 Dearborn cranks. Training has started at WCP with 2005 training to be completed and 2006 training to be started. We expect training to be completed by the end of the year. With all of the uncertainty in the industry it is easy to lose track of the less fortunate. September is the United Way Kick Off. It is more important now then ever to Support Our Community through our donations to the United Way.
