

## FEBRUARY 2007 WEBSITE REPORT

### WINDSOR CASTING

WCP has approximately 507 on roll at this time.

#### **Cranks**

Cranks will continue to work on a five day operating pattern. Unfortunately, the South American supplier is starting to come on line, which in time will reduce our crank output. No timing at this time.

#### **Blocks**

The Company has stated that they will increase the 4.2L block production by 25K. They will do this by increasing both the line speed and manpower. Seventeen jobs brought back to WCP.

#### **Union Awareness**

I would like to welcome both Kim Richards and Chris Neveu to our training department. Union Awareness training stands at approximately 40%.
