

JUNE 2006 WEBSITE REPORT

WINDSOR CASTING

Approximately 600 people on roll at WCP at this time. The block commodity continues to run on a restricted schedule, alternating between blocks and cranks. Crankshafts continues to run five days a week with the occasional overtime op during the week. There is a concern that as Oakville vamps up there will be a continued decrease in the block commodity this is expected to take place in the early fall. We will track this closely. On a positive note John Bialkowski continues to recover at an amazing pace. I would like to thank all of the plants for their financial support for John and his family.

And So the Foundry Fumes
